

Hide and seek

Is a game where one participant is looking for the others who are hiding.

You can play the game indoor or outdoor. Usually the seeker counts to 50 or 100, the seeker stands somewhere so he can't see the others. The seeker closes his eyes and count out loud so the others can hear him and know when he starts to search for them. While he is counting the others are hiding.

When the seeker is finished counting he seeks for the others and the one who he finds first is the next games seeker.

In Sweden this game is called Dunk or Kurragömma.
